**Homework 4: Develop an ASP.NET Application**

Using Visual Studio 2012 and ASP.NET 4/4.5, develop an application that collects data then displays all the information on the last view. This application should use ASP.NET webforms and offer validation using ASP.NET Validation Controls (not the jQuery Validation Plugin). I would like you to use css and layout this application in a pleasing way. (For this assignment, please don't use use javacript/jQuery at this point.)

Recommended Reading:
- Web Forms Info: http://www.asp.net/web-forms
